The Pokemong toString() Method

The toString() method in the Pokemon class should return a String in the following format:
- The name in a left justified field of width 25
- A space
- The type1 in a left justified field of width 12
- A space
- The type2 in a left justified field of width 12 (even if the pokemon has only one type)
- A space
- "Generation: "
- The generation in a left justified field of width 6
- "Legendary" if the pokemon is legendary

```
"Jirachi                  Steel        Psychic      Generation: 3      Legendary"
"DeoxysNormal Forme       Psychic                   Generation: 3      Legendary"
"Medicham                 Fighting     Psychic      Generation: 3      "
```

Note: the quotation marks are only there to show the string ends.

The PokemonTeam toString() Method

The toString() method in the PokemonTeam class should return a String in the following format:
- "First Generation Legendary Pokemon:"
- An empty line
- All the pokemon that are first generation and legendary
- Two empty lines
- "Third Generation Psychic Pokemon:"
- An empty line
- All the pokemon that are third generation and are of type Psychic
- Two empty lines
- "Legendary Water Pokemon:"
- An empty line
- All the pokemon that are legendary and are of type Water

The expected output from the Pokemon.csv file is on the following page.

First Generation Legendary Pokemon:

Articuno	Ice	Flying	Generation: 1	Legendary
Zapdos	Electric	Flying	Generation: 1	Legendary
Moltres	Fire	Flying	Generation: 1	Legendary
